We are Mondi

As a global packaging and paper group, we're proud that our products touch millions of lives every day – in the home, out shopping, at work and at play.

Delighting our customers with innovative and sustainable packaging and paper solutions is at the heart of what we do. Going the extra mile – for colleagues and customers – drives our passion for performance and is the key ingredient of Mondi's success.

This brochure has been created to showcase the way we work. We call this 'The Mondi Way' and I encourage you to visit us – online or in one of our 100 plus locations around the world – to get a first-hand experience.

It's a privilege to lead this company. Feel free to get in touch with us and share your feedback. We're inspired by ideas and love working collaboratively!

Peter Oswald
Mondi Group CEO

In touch with trends

Digitalisation, demographic shifts, environmental concerns. These are some of the main drivers behind current trends in packaging and paper.

To adapt successfully to changing markets, our customers and consumers require ever more innovative and sustainable packaging and paper solutions. With our long experience and emphasis on research and development, we stay a step ahead of those trends.

Convenient

For global consumers today, it's all about **convenience** – especially when it comes to packaging for food, personal care and home care products. Demographic changes are an important driver of this trend. For example, smaller or single households prefer smaller packaged portions and reclosable packaging to avoid food waste. Our sophisticated barrier coatings and laminates further extend product shelf life and prevent food loss – convenient and cost-saving.

User friendly

The trend for **easy-to-use, hassle-free** packaging is driven by the growing number of older people living longer, active lives. Packaging features such as handles, easy-open tear strips, pouring spouts and lightweight materials are simply more practical – for consumers of all ages.

Adapted

Urbanisation is another factor behind packaging trends, particularly in emerging economies that are experiencing strong growth in GDP and consumer goods markets. And life everywhere in the world is becoming more **fast paced and mobile**, which calls for packaging solutions adapted for use 'on the go'.

E-commerce

Shopping online is no longer just a trend, it's a way of life. If your business is online, you need packaging solutions that protect your products and provide a positive experience for the recipient. Mond designs 'right-sized' packaging that is lightweight yet strong. We minimise packaging waste, encourage recycling and offer added convenience, such as easy product returns.

In touch with trends

Sustainable

Sustainability is part of our DNA. We focus on the sustainability of all our packaging and paper products as well as our production processes. Happily, we're not alone. The rise of the conscious consumer is driving companies to offer more sustainable products and improve the sustainability of manufacturing processes. This demand is reflected in many of the biggest trends today, such as lightweight packaging, flexible packaging and the shift to fully recyclable fibre-based packaging materials.

Flexible

The switch from rigid to **flexible packaging** is a trend that touches on many of today's customer requirements. Flexible packaging is naturally lighter and more convenient for many end users. Technological developments mean that flexible materials can compete well with rigid packaging on strength and durability. Our flexible packaging solutions can help reduce packaging and shipping costs without compromising on quality.

Det här får du lägga i påsen
Matrester (tillagade eller råa)
Bröd
Grönsaker, rotfrukter och frukt
Kaffesump och kaffefilter
Te och tepåsar

Blommor och blad
Ofärgade servetter, hushållspapper

Det här får du inte lägga i påsen
Förpackad mat, korvsinn av plast, kasslemät, snus, tuggummi, kattsand, aska

Branding

The 'printability' of packaging and paper is a top priority today. Brand manufacturers facing tough competition want products to stand out on the shelf. We offer materials designed for sophisticated printing and finishing techniques that will increase brand recognition and appeal at the point of sale as well as during use.

Light-weighting

Whether for long-distance shipping or a short walk home from the supermarket, the trend for **lightweight packaging** benefits a variety of end users. It's convenient and gives significant transport cost and energy savings. The key is in the strength of those materials – and our lightweight packaging paper grades and flexible packaging have shown that they can hold up under the toughest conditions.

Printable

In the professional printing industry, there's a trend towards **hybrid printing**. Printers require paper that can deliver consistent high-quality print results across a mix of different print technologies, such as digital laser, offset and high-speed inkjet. Our range includes papers optimised for such needs.

Research and development

Packaging Paper R&D Innovation Centre

Develops containerboard, speciality and sack kraft paper products and optimises processes

Print Competence Centre

Evaluates the very best possible print quality with optimised ink consumption for a variety of our sack kraft paper, speciality kraft paper and containerboard grades

Uncoated Fine Paper Development Centre

Develops and improves a variety of paper grades for office and professional printing with focus on digital print and specialities

Consumer Packaging R&D Centre

Develops innovative flexible film solutions with state-of-the-art equipment in analytics and pilot scale manufacture, taking into account latest developments in raw material, processing and conversion technology

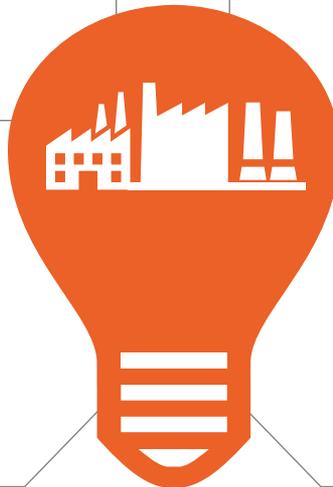

Food Safety Laboratory

Develops smart and customised packaging solutions optimised for food contact and supports our customers in meeting increasingly stringent regulatory requirements

Bag Application Centre

Tests our packaging solutions in our customers' own processes to ensure we fulfil customer requirements for industrial bags

Please visit mondigroup.com/rd and explore the ways we develop innovative solutions.

Industries we serve

Our customers come from a variety of industries and sectors, and thus require a wide range of products and solutions. Yet businesses of all kinds also face some common challenges: standing out from the competition, operating more sustainably, reducing costs and improving efficiency in their businesses.

We make our customers' work a little easier because we can offer a one-stop shop for packaging and paper and add value with our integrated approach. The following pages highlight just a few of our innovative solutions to meet customer needs.

Protection and convenience

We designed **Watermelon's Dream**, a folded corrugated box, for one of our agricultural customers in Turkey. The box, which is easy to assemble and stack, allows 50% more watermelons to be shipped in one truckload, saving our customer transport costs and reducing emissions. At the point of sale, the box's large, multicolour print area adds a valuable marketing opportunity. And shoppers like the convenience of the sturdy integrated handle for carrying home such a heavy purchase.

“The new packaging from Mondi provides a smart pick-up-&-go solution, which simplifies transport and storage of watermelons, both for retailers and consumers, and still looks great on the shelf. We are delighted with the new functional design, also because we managed to reduce the food waste in the supply chain by 13%.”

Tolga Acar
Sales Director Turkey
Mondi Corrugated Packaging

Sustainable and fresh

SKOG for Food is our sustainable packaging for filling produce such as potatoes and onions on vertical form-fill-seal (VFFS) machines. It's made of certified sustainable paper with a double-sided coating. This combination gives SKOG for Food the required barriers plus the right sealing properties for VFFS machines. Our customers can thus switch from plastic to paper packaging without needing to invest in new equipment. What's more, SKOG for Food is gas permeable so it keeps produce fresh longer. SKOG for Food is also available with our biodegradable coating Sustainex® for an even more eco-friendly packaging solution.

According to the FAO, fresh produce, such as fruits, vegetables, roots and tubers, has the highest rates of wastage of any food. Almost half of all fruits and vegetables produced is wasted.

Source: Food and Agriculture Organization of the United Nations, www.fao.org/savefood/resources/keyfindings/en/

“SKOG for Food is the result of nearly two years of intensive development. Consumers will experience eco-friendly packaging which even helps lengthen the time food can be stored at home.”

Marcin Śpiewok
Business Development Manager
SILBO

Strength and printability

One of the world's leading flour producers, the Manildra Group, has improved the quality of its 'Gem of the West' industrial and retail flour bags with Mondi's **Advantage Smooth White Strong** paper. Now the Australian company is planning to further optimise its packaging using Mondi's **Advantage Kraft White Print**. This development will ensure even stronger bags, better printability and additional cost savings for Manildra.

“Mondi’s Advantage Kraft White Print will provide us with the best solution for our customers’ requirements. This particular paper grade offers both high strength and premium printability, and we will also be able to reduce the grammage from 120 g/m² to 110 g/m².”

Nicholas Barda
Business Development Manager
Manildra Group

Visit mondigroup.com/agriculture for more of our products and solutions.

ProVantage Semi Chem flutings

Lightweight packaging for challenging conditions, especially well suited to fruit and vegetable packaging

ProVantage Kraftliner Aqua

Partly water resistant and used mainly for packaging applications in very humid environments

Transport packaging

Barrier liner solutions to protect your corrugated box and its contents

Corrugated trays

Fit to meet even the toughest supply chain requirements

Pasted/pinch/sewn open-mouth bags

Closed on one side of the tube by gluing/sewing

flexziBOX

Flexible and lightweight

“Packaging plays a huge role with pet owners. Shoppers want to know: will this be easy to open, close and carry? Does it reflect the quality that my pet deserves? Will the food stay fresh? Mondi helped us answer all of these questions with a clear yes and delivered a solution that gives our products real shelf appeal.”

Roger Mohr
CEO and Owner
Grupo Bynsa

Pets are not just animals – they are family. To help pet owners pamper their furry children, our customers turn to us – for everything from shaped pouches for treats and single-serving wet food to the robust **FlexziBox**® for heavy bags of dog food or cat litter. This premade side gusset bag is designed with convenience in mind. It can be opened and closed repeatedly, keeping products fresh longer. A carrying handle is available for extra-heavyweight bags. And the flat bottom makes it convenient for shelf display, storage and spill prevention. For brand managers in the pet food industry it's the logical choice.

Other product highlights

Advantage Kraft White Print

Combines excellent physical strength, very good runnability and great printability

Self-standing open-mouth bags

Block bottom bags available in different sizes with or without gusset

Premade pouches and laminates

Printed with high-quality graphics

A palette of features

Pocket zips, top sliders, handles and more

Home and personal care

One-stop shop for comfort, softness and discretion

Whether for femcare, baby-care or adult-care products, our customers prefer working with a supplier that can realise a complete product concept – not just pieces and parts. We design and build products from top to bottom, and produce pad components and wrappers under one roof. We supply release liners, barrier laminates, elastic diaper components and frontal tapes produced with advanced technology. It's one-stop shopping convenience!

Looking for someone who sees the whole diaper picture – not just the parts?

Some other solutions

Baby care

Diaper and pant components including stretch films, laminates and soft nonwovens

Femcare

Wrapper films for discretion, release liners and nonwoven components for comfort and absorbency

Adult incontinence

Elastic materials and nonwovens for comfort, fit and softness

Wipes

Lightweight, lint-free soft or scrubby nonwovens for baby-care, disinfection or all-purpose wipes

Water-soluble films

Sustainable and water-soluble films for single-dose powder detergents

Label films

High-quality label face stock films

mondigroup.com/home-and-personal-care

Easy and flexible opening

Consumers of all ages prefer packaging that is easy to open – especially when snacking on the go. We designed a bag that can be opened to varying degrees without needing scissors or much effort. With **CornerPack**'s semi-circular, parallel scoring lines, consumers can choose how widely or narrowly to open the pack simply by tearing along a line. Convenient, easy and no mess!

GERMAN PACKAGING AWARD 2017

Winner in the 'Functionality & Convenience' category

“By pre-punching the scoring lines, our customers can offer packaging that eliminates uncontrolled tears and product spillage. The new design is foolproof. No instructions needed, just follow the intuitive pathways.”

Wilfried Thobe
R&D and Innovation Manager
Mondi Consumer Goods Packaging

Quick and convenient

SteamFast is the global leader in functional packaging for microwave steam cooking. The award-winning technology is simple and effective. It allows steam and pressure to build up within the bag so that consumers can enjoy great-tasting, healthy food that cooks in minutes. There's no need to add water, stir or even cut the bag open until it's ready to be served. Our SteamFast range of pouches and packs includes the Sauce & Steam, Prep & Steam, Zip & Steam, SoupFast and Store & Steam products. For busy lifestyles, it's a welcome innovation in healthy cooking technology and convenience.

For perfect protection

Barrier option

Functional coatings that expand the possibilities

“To us, there is no other packaging material that can match Mondi’s SpringPack Plus grade for roll-packing. It is the best suitable material to compress and roll-pack the springs in a safe way and without putting them at risk of damage.”

Costas Georgallis
Owner
Amelco Industries Ltd

Strong and sustainable

Mondi’s **Advantage MF SpringPack Plus** is an extremely strong premium speciality kraft paper. We designed it especially for roll-packing and compressing bulky goods with a material that is 100% renewable and recyclable. With Advantage MF SpringPack Plus, our customers can pack products like mattress innersprings more tightly and efficiently – resulting in better handling, product protection and considerable cost savings. It even resulted in a world record for Amelco Industries for packing the most rolled innersprings (2,200 units) into one 20-foot shipping container!

WORLD RECORD IN ONE 20' CONTAINER

2,200 Bonnell spring units
20 units per roll
claimed by Amelco Industries Ltd

Enhanced product experience

Box a Treasure is one of our many retail packaging solutions designed to enhance brand appeal at the point of sale. This packaging, designed for the brand relaunch of an Austrian toy manufacturer, is part of the overall product experience. The single-piece cardboard box resembles a toolbox or treasure chest, in sync with the wooden toys inside. With a lid that can be opened and closed over and over again, the box takes on a fun aspect and a storage function. It's an excellent example of how packaging can breathe new life into products and turn them into a timeless treasure.

IF DESIGN AWARD 2018

Winner in design and customer success for promotional concept

WELLPAPPE AUSTRIA AWARD 2017

Winner in the 'Point-of-Sale' category

“It has paid off to challenge packaging design standards. Our relaunched product has exceeded expectations and has been well received by our customers. We're pleased it has excited the new generation, too.”

Michael Tobias
Managing Director
Matador Spielwaren GmbH

Lightweight and sustainable

Along with the growth of e-commerce, the demand for more efficient and lightweight packaging materials is also increasing. While corrugated boxes and plastic bags have become commonplace, we've developed the next generation of a more sustainable e-commerce solution. Our paper bag solution for the **courier, express and parcel industry** is a flexible, strong and durable paper bag suitable for a big range of items from electronics to clothing. It's made of Mondi's **Advantage One** sack kraft paper and shaped like an envelope with a tear strip for easy opening. The double adhesive closing feature also makes product returns more convenient for consumers. By minimising the packaging material and weight, we can also help our own customers save on shipping costs and make their packaging process faster.

“The recyclable paper bag is clearly a more efficient and sustainable solution for our online retail customers.”

Claudio Fedalto
Sales and Marketing Director
Mondi Industrial Bags

Strong and efficient

Some products being marketed online, such as bottled wine, pose special packaging challenges. Vintners, wine merchants and distributors require high-performance boxes – in a variety of sizes – that are cost efficient in both fulfilment processes and material usage and yet strong enough to protect the bottles during transport. Our **Vino Box® Sprint** saves both time and money for our customers in this segment. It uses less corrugated material and yet is highly stable, with a shock-absorbing buffer zone around the bottles. The pre-glued one-piece box requires no assembly: it simply pops up from a flat pack and is ready to use. Now that's something worth toasting!

“Customers appreciate the speed and ease with which the boxes stand ready for filling. And the choice of sizes for one, two, three, four or six bottles gives them great flexibility for fulfilling online orders.”

Jan Donaubauer
Sales Director
Mondi Bad Rappenau

Luxury feel, great value

Demand from car buyers today blurs the line between 'economy' and 'luxury'. They now expect lower-cost models to feature high-grade interiors with a feel-good factor. Yanfeng Automotive Interiors has developed a manufacturing process that saves costs when producing luxury-style interior components. Their process uses our **thermoforming film** to bond and seal the decorative surface with the carrier. Our film is part of a supply chain equation that lets car buyers enjoy a superior look and feel as well as a solid safety performance for a great value.

© Yanfeng Automotive Interiors, 2015

“Mondi demonstrated expertise and competence in fine-tuning their film to our manufacturing process and therefore contributed to our cost-effective, high-value interior components.”

Peter Thielhorn
Process Innovation Manager
Yanfeng Automotive Interiors

Stronger and more water repellent

Never satisfied with good enough, we challenged ourselves to make our popular **SPLASHBAG** even stronger and more water repellent than before. **SPLASHBAG**, made from our **Advantage Protect** paper, now resists direct rain and water for up to six hours (previously two) and can be stored in wet environments for up to 120 hours (previously 12). It's the ideal paper-based solution for optimal rain protection and extended shelf life of cement and building materials under humid conditions.

“We were looking for a bag solution that resists rain and moisture, when cement bags are exposed outside. We have successfully introduced SPLASHBAG in our target markets, and with this innovation we can offer our customers a bag that protects our products.”

Michèle Duval
Products and Services Range Director
Lafarge France

High quality, saving costs

Our **Advantage Select** sack kraft paper has enabled the largest cement packaging company in Pakistan to switch most of its production from three-ply to two-ply bags without compromising on strength or quality. As a result, Cherat Packaging has reshaped the market and delivered considerable material and cost savings. Its two-ply bags made with Advantage Select are now used by almost all cement plants in Pakistan and are greatly appreciated by customers.

“Mondi’s Advantage Select paper was the perfect choice. The 80/85 g/m² variant has revolutionised paper bag sales in Asia, as it has provided us as well as our customers with high-quality, low-cost solutions. The bags are lighter yet stronger than the previous three-ply versions.”

Amer Faruque
CEO
Cherat Packaging Limited

Unleash your creativity

We designed our **PERGRAPHICA®** portfolio of premium uncoated fine papers to meet the exacting needs of the creative and commercial print industries. A hybrid paper, PERGRAPHICA® works well with all printing technologies, delivering consistent high-quality results. It also allows a variety of sophisticated post-print processing, such as cellophaning, embossing, creasing, die-cutting and more.

“The best feature of PERGRAPHICA® is freedom. PERGRAPHICA® gives us the freedom to do almost everything. The covers of our magazine *Digitalic* have different processes of printing, and PERGRAPHICA® keeps its qualities unchanged even after very different ennobling processes. For our creativity, this is a great advantage.”

Francesco Marino
Founder
Digitalic

Fast and efficient

Our **Air^xLiners[®]** are a family of structured liners produced out of different substances for self-adhesive products. Unlike plain liners, Air^xLiners[®] have an air egress function that eliminates bubbles and wrinkles when the backing material is applied to the end product. The structured liners also offer a higher adhesive slideability, meaning our customers enjoy easier handling. Air^xLiners[®] can be used with a variety of self-adhesive products, especially those for the graphic arts industry.

“This does more than an ordinary release liner. The air egress function gives superior performance and greater efficiency in the use of self-adhesive films.”

Herbert Heller
International Key Account and
Business Development Manager

Office paper

Reliable and sustainable

Our **Color Copy** office paper is by far the most well-known brand of office paper in Europe for colour printing applications. Customers have relied on it for over a quarter of a century for perfect print results and consistent quality. It also has an exceptional environmental profile: CO₂ neutral and FSC®, EU Ecolabel and ISO 9706 certifications. Recently we redesigned its wrapper to be even stronger and more convenient to handle. It's still the same great Color Copy quality, now with a fresh design and packaging that is more user friendly.

“92% of users surveyed told us they are very satisfied with the quality of the paper and we shouldn’t change anything. So we’ve focused on the branding, improved packaging and new convenience options where we could make Color Copy even better – on the outside – while retaining strong brand recognition.”

In touch with the future

Collaborate, innovative, inspire. Advances in technology, communication and information-sharing have opened many new doors. Walk through them with us.

One example of how we collaborate to inspire and innovate is the **Mondi Speed Data Hackathon**. Fifty PhD students from all over Europe took part in this workshop at the Graz University of Technology in Austria. In small teams mentored by Mondi employees, the doctoral students used big data concepts to imagine novel packaging and paper applications and manufacturing.

“By organising this year’s student workshop, Mondi showed its ongoing commitment to driving that innovation and its integral role in helping the industry keep moving forward.”

Tad Maloney
President
Association of European Fibre and Paper
Research Organisations (EFPRO)

Hackathon.

Digital sales and service 24/7

Our digital sales and service platforms give customers round-the-clock access to our information and products. Here are a few of our e-tools:

myMondi

The digital service platform for uncoated fine paper customers. Search your customised portfolio, send orders or inquiries, check stock availability and much more.

ebags

Our online platform where our industrial bags customers can place and track orders. Soon to be improved with more functions, information and user friendliness.

Corrugated-paper-expert

Offers our containerboard customers exclusive online access to technical information and insights about containerboard, converting and corrugated board.

Sustainable development

Partnership for a sustainable future

In 2017 we extended our global Partnership with **WWF** by another three years. We're continuing to focus on the promotion of responsible forestry and a sustainable pulp and packaging sector.

By working together, we aim to explore, develop and share innovative approaches that will help us meet customer needs and at the same time reduce our impact on the environment.

To do so, we're tackling three of the biggest challenges facing humanity today: deforestation, water scarcity and climate change.

SUSTAINING
ECOSYSTEMS
THROUGH
RESPONSIBLE
BUSINESS PRACTICES

Growing responsibly

Our business – and our society – face sustainability challenges that are ever changing and increasingly complex. Our Growing Responsibly model is the framework through which we respond to these challenges and opportunities.

Covering 16 commitments within 10 action areas, the model enables us to demonstrate, monitor and improve our sustainability performance in everything we do, across the entire value chain.

Solutions that create value for our customers

Employee and contractor safety

Relationships with communities

A skilled and committed workforce

Supplier conduct and responsible procurement

Fairness and diversity in the workplace

Biodiversity and ecosystems

Sustainable fibre

Constrained resources and environmental impacts

Climate change
